

2012 Freescale Generic Drug List

The medications included on this **Freescale Generic Drug List** are considered Generic Drugs (Tier 1) under the Freescale Prescription Drug Program. **Generics should be considered the first line of prescribing.** This program is available to members in the Freescale Medical Plan.

This drug list applies to the Freescale pharmacy plan as of October 2012. This list is typically updated every three months. An updated drug list will be available at www.caremark.com in late December for coverage starting January 1, 2013. Please visit www.caremark.com or call (877) 505-8360 if you have any questions.

PLAN MEMBER

Your benefit plan provides you with a prescription benefit program. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

Please note:

- Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber.

HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

Please note:

- Generics should be considered the first line of prescribing.
- This drug list represents a summary of prescription coverage. It is not inclusive and does not guarantee coverage.
- Unless specifically indicated, drug list products will include all dosage forms.
